

Connor Cochran

ccoch@uic.edu

Education

University of Illinois Chicago - Chicago, IL
Master of Computer Science | GPA: 4.0

Aug. 2024 - Current

Indiana University - Bloomington, IN
Bachelor of Science - Informatics | Minor in Business

Aug. 2016 - May 2020

Projects

ASLBot - American Sign Language Robotic Learning Assistant

- Built distributed robotics system integrating a Node.js backend, computer vision classification, and Misty II platform
- Implemented real-time ASL handsign classification and predictions to lesson control and respective robot animations
- Designed expressive robot feedback grounded in HRI design principles for d/Deaf and Hard-of-Hearing children

Undisclosed iOS Photogrammetry Application

- Developed an iOS application integrating on-device depth sensing with real-time 3D mesh visualization
- Built SwiftUI and RealityKit interface supporting interactive manipulation of spatial geometry
- Implemented depth processing pipeline enabling on-device 3D reconstruction workflows

Professional Service

Associate Engineer

Jul. 2022 - Jul. 2024

AbbVie Inc.

- Designed and deployed Operating System deployment strategy for all enterprise devices
- Migrated legacy imaging software to Microsoft System Center Configuration Manager
- Developed custom security workflows for enterprise imaging pipeline

Business Technology Solutions Development Rotation Program

Jul. 2020 - Jul. 2022

AbbVie Inc.

Connected Plant Technical Analyst

- Managed manufacturing automation system stack for five global sites
- Administered development environment codebase migrations for each release cycle
- Independently formed O365-integrated application for adverse manufacturing events for all 26 global enterprise sites

Endpoint Operations Technical Analyst

- Implemented automated diagnostic tools to monitor and improve system performance across 70,000+ endpoints
- Created dynamic Windows patch pilot group diagnostics using Nexthink User Experience platform
- Developed enterprise data visualization dashboards using Python and PowerBI, improving insights across large datasets

Brand Technology Business Analyst

- Developed brand messaging data framework allowing for new commercial sales data insights
- Iterated on nine wireframes following a designated team design philosophy
- Led user requirement gathering session that designated business and technical specifications

Teaching & Mentorship Experience

Tutor

Aug. 2025 - Current

Project: Vision

- Tutored high school students (grades 9–12) with homework support, subject tutoring, and test prep
- Led structured enrichment activities to build problem-solving and academic skills
- Mentored students and tracked progress through notes and reports

Technical Skills

Languages: Swift, TypeScript, JavaScript, Python, Java, Scala, SQL

Frameworks & Platforms: SwiftUI, RealityKit, ARKit, React, Node.js, Express, Flask

Databases & Tools: PostgreSQL, NoSQL, Docker, Jest
